

Catch the *iWave* Phenomenon!

***Don't just take our word for it...
hear what iWave users are saying:***

"I have been in the HVAC business for over 30 years, and I wanted to let you know how pleased my wife and I are with your Global Plasma product. I purchased your product for the intention of getting rid of dog smell, dust and my wife's allergy problems. I want to inform you that all three complaints are 90-100% improved. My wife and I are very pleased with this product." – *Service Manager at Dring Air Conditioning & Heating*

"I wanted to let you know how satisfied we are with the GPS ion generators recently installed in our home. We live in an old frame house on the hot and humid Mississippi gulf coast that has a crawl space that seems to remain damp. My wife has always complained about the damp feel, and the mildew smell, in the house. A couple of days after the ion generators were installed, we drove our grand-daughter back to college and were gone for six days. With the house closed up for that whole time, we knew that this would be the supreme test of the ion generators. The generators passed with flying colors. My wife is happy; therefore, I am ecstatic!" – *Joe at Allred Architectural Group*

"I am thrilled with the change in our air quality after installing the GPS unit in our residential furnace. As someone who suffers with allergies and asthma, I have seen vast improvement in my health after installation. When we moved recently, I had not re-installed the device right away and immediately noticed I had issues. However, within days of installing the device in the new furnace, most of my asthma attacks and allergy symptoms had gone away. As a licensed engineer designing all types of commercial HVAC, I can say that the energy savings in commercial applications and the health benefits of the device appear to be well worth the cost." – *Thomas at M&H Engineering LLC*

"The Global Plasma Solutions has been installed in my building for approximately one and a half years, and I have to say the overall impact on what it has accomplished was dramatic. The recovery area of my animal hospital was an enclosed area with no return air; the room was originally too warm – stagnant air to be exact, with an overpowering urine smell! After installing the GPS system, immediately I noticed a difference in the smell, and within 24 hours, the smell was completely gone." – *Dr. Jeff Young with Planned Pethood Plus*
